

What is claimed is:

1. A backprinting recording medium, comprising a transparent substrate, an ink-absorbing layer formed on the transparent substrate and a porous ink-permeable layer formed on the ink-absorbing layer and produced by dispersing a filler in a binder resin, wherein the binder resin constituting the ink-permeable layer has a glass transition temperature of 10°C or higher, and a Shore D hardness at 25°C of 40 or higher.

2. The backprinting recording medium as defined in Claim 1, wherein the binder resin constituting the ink-permeable layer has a glass transition temperature of 130°C or lower, and a Shore D hardness at 25°C of 90 or lower.

3. The backprinting recording medium as defined in Claim 1 ~~or 2~~, wherein the binder resin constituting the ink-permeable layer is a polyester-based resin.
